

THE FUTURE OF AUDIOLOGY

IN-PERSON TRAINING

WELCOME!

We are excited that you are joining us for this GSI audiology training that is touring across the UK. Today we will explore trends in best practices for audiologic testing with our partners at Guymark. This workshop is designed to be engaging and informative. You will walk away with new information from GSI and Guymark that will enhance your testing now and into the future.

AGENDA

9:00–9:30

Arrivals

9:30–9:45

Introduction to GSI and Guymark

9:45–10:45

Automated Audiometry

BREAK

11:00–12:00

WideBand Tympanometry

LUNCH

13:00–14:00

Data Management

BREAK

14:15–15:30

Hands-on Experience

CONCLUSIONS

15:30–16:00

Q&A and Closing Statements

TOPICS

The landscape of audiology is rapidly changing. The shortage of audiologists and the advancements in technology opens up an opportunity for a fresh look at how we provide our basic services.

✓ PART 1

The Future of Audiology: Automated Audiometry

This course will provide the framework for implementation of automated audiometry into every audiology practice.

✓ PART 2

The Future of Audiology: WideBand Tympanometry

This course will provide information for implementation of WideBand Tympanometry to supplement traditional middle-ear evaluations

✓ PART 3

The Future of Audiology: Data Management

This course will provide information on electronic data management, connectivity, and workflow efficiency.

✓ PART 4

Hands-on Training, Routine Maintenance, and Troubleshooting

This course will provide hands on experience with GSI's audiometers, tympanometers, and OAE devices. We'll go over tips and tricks for keeping your diagnostic equipment working properly to ensure efficient patient care.
